

Comprehensive Report

Acunetix Threat Level 2

One or more medium-severity type vulnerabilities have been discovered by the scanner. You should investigate each of these vulnerabilities to ensure they will not escalate to more severe problems.

Scan Detail

Target	https://capitansissy.cw:444/
Scan Type	Full Scan
Start Time	Dec 31, 2021, 9:26:31 PM GMT+3
Scan Duration	1 hour, 5 minutes
Requests	178431
Average Response Time	1ms
Maximum Response Time	13118ms

High

Medium

Low

Informational

Severity	Vulnerabilities	Instances
 High	0	0
 Medium	2	2
 Low	8	8
 Informational	4	7
Total	14	17

Informational

Low Severity

Medium Severity

Impacts

SEVERITY	IMPACT	
 Medium	1	Application error messages
 Medium	1	Vulnerable JavaScript libraries
 Low	1	Clickjacking: CSP frame-ancestors missing
 Low	1	Clickjacking: X-Frame-Options header
 Low	1	Composer installed.json publicly accessible
 Low	1	Cookies with missing, inconsistent or contradictory properties
 Low	1	HTTP Strict Transport Security (HSTS) not implemented
 Low	1	Possible sensitive directories
 Low	1	Session token in URL
 Low	1	TRACE method is enabled
 Informational	1	Content Security Policy (CSP) not implemented
 Informational	1	File uploads
 Informational	1	Javascript Source map detected
 Informational	4	Outdated JavaScript libraries

Application error messages

This alert requires manual confirmation

Acunetix found one or more error/warning messages. Application error or warning messages may expose sensitive information about an application's internal workings to an attacker.

These messages may also contain the location of the file that produced an unhandled exception.

Consult the 'Attack details' section for more information about the affected page(s).

Impact

Error messages may disclose sensitive information which can be used to escalate attacks.

<https://capitansissy.cw:444/>

Application error messages:

- <https://capitansissy.cw:444/phpmyadmin/index.php>
Fatal error
- <https://capitansissy.cw:444/phpmyadmin/js/messages.php>
Fatal error

Request

```
POST /phpmyadmin/index.php?lang=en&route[]=/&server=1 HTTP/1.1

Host: capitansissy.cw:444
Connection: Keep-alive

DisplayServersList=on&FirstLevelNavigationItems=100&MaxNavigationItems=50&NavigationDisplayLogo=on&NavigationDisplayServers=on&NavigationLinkWithMainPanel=on&NavigationLogoLink=index.php&NavigationLogoLinkWindow=main&NavigationTreeAutoexpandSingleDb=on&NavigationTreeDbSeparator=_&NavigationTreeDefaultTabTable=structure&NavigationTreeDefaultTabTable2=structure&NavigationTreeDisplayDbFilterMinimum=30&NavigationTreeDisplayItemFilterMinimum=30&NavigationTreeEnableExpansion=on&NavigationTreeEnableGrouping=on&NavigationTreePointerEnable=on&NavigationTreeShowEvents=on&NavigationTreeShowFunctions=on&NavigationTreeShowProcedures=on&NavigationTreeShowTables=on&NavigationTreeShowViews=on&NavigationTreeTableLevel=1&NavigationTreeTableSeparator=__&NavigationWidth=240&NumFavoriteTables=10&NumRecentTable
```

Recommendation

Verify that these page(s) are disclosing error or warning messages and properly configure the application to log errors to a file instead of displaying the error to the user.

Description

While information disclosure vulnerabilities are not directly exploitable by an attacker, they may help an attacker to learn about system specific information. The following is a list of **some** of the information an attacker may be able to obtain from application error disclosure.

- Internal IP addresses
- Secrets (passwords, keys, tokens...)
- Operating system distributions
- Software version numbers
- Missing security patches
- Application stack traces
- SQL statements
- Location of sensitive files (backups, temporary files...)
- Location of sensitive resources (databases, caches, code repositories...)

Vulnerable JavaScript libraries

You are using one or more vulnerable JavaScript libraries. One or more vulnerabilities were reported for this version of the library. Consult Attack details and Web References for more information about the affected library and the vulnerabilities that were reported.

Impact

Consult References for more information.

<https://capitansissy.cw:444/>

Confidence: 80%

- **jQuery 3.3.1-dfsg**

- URL: https://capitansissy.cw:444/phpmyadmin/doc/html/_static/jquery.js
- Detection method: The library's name and version were determined based on the file's contents. Acunetix performed a syntax analysis of the file and detected functional differences between the file and the original library version. As the file was likely modified on purpose, the confidence level of the vulnerability alert has been lowered.

 - <https://jquery.com/upgrade-guide/3.5/>
 - <https://api.jquery.com/jQuery.htmlPrefilter/>

Request

```
GET /phpmyadmin/doc/html/_static/jquery.js HTTP/1.1
Referer: https://capitansissy.cw:444/phpmyadmin/doc/html/config.html
Cookie: phpMyAdmin_https=habh57iml0ijeu6kr19v7nugj1; pma_lang_https=en
Accept: text/html,application/xhtml+xml,application/xml;q=0.9,*/*;q=0.8
Accept-Encoding: gzip,deflate,br
User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko)
Chrome/92.0.4512.0 Safari/537.36
Host: capitansissy.cw:444
Connection: Keep-alive
```

Recommendation

Upgrade to the latest version.

Clickjacking: CSP frame-ancestors missing

Clickjacking (User Interface redress attack, UI redress attack, UI redressing) is a malicious technique of tricking a Web user into clicking on something different from what the user perceives they are clicking on, thus potentially revealing confidential information or taking control of their computer while clicking on seemingly innocuous web pages.

The server didn't return a **frame-ancestors** directive in the Content-Security-Policy header which means that this website could be at risk of a clickjacking attack. The frame-ancestors directives can be used to indicate whether or not a browser should be allowed to render a page inside a frame. Sites can use this to avoid clickjacking attacks, by ensuring that their content is not embedded into other sites.

Impact

The impact depends on the affected web application.

<https://capitansissy.cw:444/>

Paths without CSP frame-ancestors:

- <https://capitansissy.cw:444/phpmyadmin/>
- <https://capitansissy.cw:444/phpmyadmin/url.php>
- <https://capitansissy.cw:444/phpmyadmin/index.php>

Request

```
GET /phpmyadmin/ HTTP/1.1
Referer: https://capitansissy.cw:444/
Accept: text/html,application/xhtml+xml,application/xml;q=0.9,*/*;q=0.8
Accept-Encoding: gzip,deflate,br
User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko)
Chrome/92.0.4512.0 Safari/537.36
Host: capitansissy.cw:444
Connection: Keep-alive
```

Recommendation

Configure your web server to include a CSP header with frame-ancestors directive and an X-Frame-Options header. Consult Web references for more information about the possible values for this header.

<https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/X-Frame-Options>

Clickjacking: X-Frame-Options header

Clickjacking (User Interface redress attack, UI redress attack, UI redressing) is a malicious technique of tricking a Web user into clicking on something different from what the user perceives they are clicking on, thus potentially revealing confidential information or taking control of their computer while clicking on seemingly innocuous web pages.

The server did not return an **X-Frame-Options** header with the value DENY or SAMEORIGIN, which means that this website could be at risk of a clickjacking attack. The X-Frame-Options HTTP response header can be used to indicate whether or not a browser should be allowed to render a page inside a frame or iframe. Sites can use this to avoid clickjacking attacks, by ensuring that their content is not embedded into untrusted sites.

Impact

The impact depends on the affected web application.

<https://stackoverflow.com/questions/958997/frame-buster-buster-buster-code-needed>

Composer installed.json publicly accessible

A **installed.json** file was discovered. Composer is a tool for dependency management in PHP. It allows you to declare the libraries your project depends on and it will manage (install/update) them for you. After installing the dependencies, Composer stores the list of them in a special file for internal purposes.

As the file is publicly accessible, it leads to disclosure of information about components used by the web application.

Impact

installed.json discloses sensitive information. This information can be used to launch further attacks.

<https://capitansissy.cw:444/phpmyadmin/>

Request

```
GET /phpmyadmin/vendor/composer/installed.json HTTP/1.1
Accept: text/html,application/xhtml+xml,application/xml;q=0.9,*/*;q=0.8
Accept-Encoding: gzip,deflate,br
User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko)
Chrome/92.0.4512.0 Safari/537.36
Host: capitansissy.cw:444
Connection: Keep-alive
```

Recommendation

Restrict access to vendors directory

Cookies with missing, inconsistent or contradictory properties

At least one of the following cookies properties causes the cookie to be invalid or incompatible with either a different property of the same cookie, or with the environment the cookie is being used in. Although this is not a vulnerability in itself, it will likely lead to unexpected behavior by the application, which in turn may cause secondary security issues.

Impact

<https://capitansissy.cw:444/>

Verified

List of cookies with missing, inconsistent or contradictory properties:

- <https://capitansissy.cw:444/phpmyadmin/>

Cookie was set with:

```
Set-Cookie: phpMyAdmin_https=e4ec11jv5b3n7uqhg31p1bp206; path=/phpmyadmin/;
secure; HttpOnly
```

This cookie has the following issues:

- Cookie without SameSite attribute.

When cookies lack the SameSite attribute, Web browsers may apply different and sometimes unexpected defaults. It is therefore recommended to add a SameSite attribute with an appropriate value of either "Strict", "Lax", or "None".

- <https://capitansissy.cw:444/phpmyadmin/index.php>

Cookie was set with:

```
Set-Cookie: phpMyAdmin_https=e4ec11jv5b3n7uqhg31p1bp206; path=/phpmyadmin/;

HTTP Strict Transport Security (HSTS) not implemented

HTTP Strict Transport Security (HSTS) tells a browser that a web site is only accessible using HTTPS. It was detected that your web application doesn't implement HTTP Strict Transport Security (HSTS) as the Strict

Transport Security header is missing from the response.

Impact

HSTS can be used to prevent and/or mitigate some types of man-in-the-middle (MitM) attacks

<https://capitansissy.cw:444/>

URLs where HSTS is not enabled:

Request

```
GET /phpmyadmin/ HTTP/1.1
Referer: https://capitansissy.cw:444/
Accept: text/html,application/xhtml+xml,application/xml;q=0.9,*/*;q=0.8
Accept-Encoding: gzip,deflate,br
User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko)
Chrome/92.0.4512.0 Safari/537.36
Host: capitansissy.cw:444
Connection: Keep-alive
```

Recommendation

It's recommended to implement HTTP Strict Transport Security (HSTS) into your web application. Consult [web references](#) for more information

References

hstspreload.org

<https://hstspreload.org/>

[Strict-Transport-Security](https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Strict-Transport-Security)

<https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Strict-Transport-Security>

Possible sensitive directories

One or more possibly sensitive directories were found. These resources are not directly linked from the website. This check looks for common sensitive resources like backup directories, database dumps, administration pages, temporary directories. Each one of these directories could help an attacker to learn more about his target.

Impact

These directories may expose sensitive information that could help a malicious user to prepare more advanced attacks.

<https://capitansissy.cw:444/>

Possible sensitive directories:

- <https://capitansissy.cw:444/phpmyadmin>
- <https://capitansissy.cw:444/phpmyadmin/setup>

Request

```
GET /phpmyadmin/ HTTP/1.1
Accept: text/html,application/xhtml+xml,application/xml;q=0.9,*/*;q=0.8
Accept-Encoding: gzip,deflate,br
User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko)
Chrome/92.0.4512.0 Safari/537.36
Host: capitansissy.cw:444
Connection: Keep-alive
```

Recommendation

Restrict access to these directories or remove them from the website.

References

Session token in URL

This application contains one or more pages with what appears to be a session token in the query parameters. A session token is sensitive information and should not be stored in the URL. URLs could be logged or leaked via the Referer header.

Impact

Possible sensitive information disclosure.

<https://capitansissy.cw:444/>

Pages with session token in URL:

- https://capitansissy.cw:444/phpmyadmin/url.php?url=https://dev.mysql.com/doc/refman/5.7/en/server-error-reference.html&ajax_request=true&ajax_page_request=true&_nocache=1640973607726787765&token=377e512d525e674d3a695c3f5e793e57 (token)

Request

```
GET /phpmyadmin/url.php?url=https%3A%2F%2Fdev.mysql.com%2Fdoc%2Frefman%2F5.7%2Fen%2Fserver-error-reference.html&ajax_request=true&ajax_page_request=true&_nocache=1640973607726787765&token=377e512d525e674d3a695c3f5e793e57 HTTP/1.1
Host: capitansissy.cw:444
accept: */*
x-requested-with: XMLHttpRequest
accept-language: en-US
cookie: pma_lang_https=en; phpMyAdmin_https=in8jl1leea297nsrc9b9mq1pef
Sec-Fetch-Site: same-origin
Sec-Fetch-Mode: cors
Sec-Fetch-Dest: empty
Accept-Encoding: gzip, deflate, br
Connection: keep-alive
User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko) Chrome/92.0.4512.0 Safari/537.36
```

Recommendation

The session should be maintained using cookies (or hidden input fields).

TRACE method is enabled

HTTP TRACE method is enabled on this web server. In the presence of other cross-domain vulnerabilities in web browsers, sensitive header information could be read from any domains that support the HTTP TRACE method.

Impact

Attackers may abuse HTTP TRACE functionality to gain access to information in HTTP headers such as cookies and authentication data.

Request

```
TRACE /aRd8lZUZ1C HTTP/1.1
Accept: text/html,application/xhtml+xml,application/xml;q=0.9,*/*;q=0.8
Accept-Encoding: gzip,deflate,br
User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko)
Chrome/92.0.4512.0 Safari/537.36
Host: capitansissy.cw:444
Connection: Keep-alive
```

Recommendation

Disable TRACE Method on the web server.

Content Security Policy (CSP) not implemented

Content Security Policy (CSP) is an added layer of security that helps to detect and mitigate certain types of attacks, including Cross Site Scripting (XSS) and data injection attacks.

Content Security Policy (CSP) can be implemented by adding a **Content-Security-Policy** header. The value of this header is a string containing the policy directives describing your Content Security Policy. To implement CSP, you should define lists of allowed origins for the all of the types of resources that your site utilizes. For example, if you have a simple site that needs to load scripts, stylesheets, and images hosted locally, as well as from the jQuery library from their CDN, the CSP header could look like the following:

```
Content-Security-Policy:
default-src 'self';
script-src 'self' https://code.jquery.com;
```

It was detected that your web application doesn't implement Content Security Policy (CSP) as the CSP

header is missing from the response. It's recommended to implement Content Security Policy (CSP) into your web application.

Impact

CSP can be used to prevent and/or mitigate attacks that involve content/code injection, such as cross-site scripting/XSS attacks, attacks that require embedding a malicious resource, attacks that involve malicious use of iframes, such as clickjacking attacks, and others.

<https://capitansissy.cw:444/>

- <https://capitansissy.cw:444/phpmyadmin/doc/html/copyright.html>
- <https://capitansissy.cw:444/phpmyadmin/doc/html/genindex.html>

Request

```
GET /functions.php HTTP/1.1
Referer: https://capitansissy.cw:444/
Accept: text/html,application/xhtml+xml,application/xml;q=0.9,*/*;q=0.8
Accept-Encoding: gzip,deflate,br
User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko)
Chrome/92.0.4512.0 Safari/537.36
Host: capitansissy.cw:444
Connection: Keep-alive
```

Recommendation

It's recommended to implement Content Security Policy (CSP) into your web application. Configuring Content Security Policy involves adding the **Content-Security-Policy** HTTP header to a web page and giving it values to control resources the user agent is allowed to load for that page.

References

[Content Security Policy \(CSP\)](https://developer.mozilla.org/en-US/docs/Web/HTTP/CSP)

<https://developer.mozilla.org/en-US/docs/Web/HTTP/CSP>

[Implementing Content Security Policy](https://hacks.mozilla.org/2016/02/implementing-content-security-policy/)

<https://hacks.mozilla.org/2016/02/implementing-content-security-policy/>

File uploads

These pages allows visitors to upload files to the server. Various web applications allow users to upload files (such as pictures, images, sounds, ...). Uploaded files may pose a significant risk if not handled correctly. A remote attacker could send a multipart/form-data POST request with a specially-crafted filename or mime type and execute arbitrary code.

Impact

If the uploaded files are not safely checked an attacker may upload malicious files.

<https://capitansissy.cw:444/>

Pages with file upload forms:

- <https://capitansissy.cw:444/phpmyadmin/index.php>

Form name: import

Form action: index.php?route=/import

Form method: POST

Form file input: import_file [file]

Request

```
GET /phpmyadmin/index.php?lang=en&route=/server/import HTTP/1.1
Referer: https://capitansissy.cw:444/phpmyadmin/
Cookie: phpMyAdmin_https=68lvtdl94v01tvoucd15ejhd9e; pma_lang_https=en
Accept: text/html,application/xhtml+xml,application/xml;q=0.9,*/*;q=0.8
Accept-Encoding: gzip,deflate,br
User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko)
Chrome/92.0.4512.0 Safari/537.36
Host: capitansissy.cw:444
Connection: Keep-alive
```

Recommendation

Restrict file types accepted for upload: check the file extension and only allow certain files to be uploaded. Use a whitelist approach instead of a blacklist. Check for double extensions such as .php.png. Check for files without a filename like .htaccess (on ASP.NET, check for configuration files like web.config). Change the permissions on the upload folder so the files within it are not executable. If possible, rename the files that are uploaded.

Javascript Source map detected

Client side Javascript source code can be combined, minified or compiled. A source map is a file that maps from the transformed source to the original source. Source map may help an attacker to read and debug Javascript.

Impact

Access to source maps may help an attacker to read and debug Javascript code. It simplifies finding client-side vulnerabilities

<https://capitansissy.cw:444/>

URLs where links to SourceMaps were found:

- sourceMappingURL in JS body -
<https://capitansissy.cw:444/phpmyadmin/js/vendor/bootstrap/bootstrap.bundle.min.js>
- sourceMappingURL in JS body - <https://capitansissy.cw:444/phpmyadmin/js/vendor/zxcvbn.js>

Request

```
GET /phpmyadmin/js/vendor/bootstrap/bootstrap.bundle.min.js HTTP/1.1
Referer: https://capitansissy.cw:444/phpmyadmin/
Cookie: phpMyAdmin_https=8g7faihmsuf8p9u8d4p99nqt7d; pma_lang_https=en
Accept: text/html,application/xhtml+xml,application/xml;q=0.9,*/*;q=0.8
Accept-Encoding: gzip,deflate,br
User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko)
Chrome/92.0.4512.0 Safari/537.36
Host: capitansissy.cw:444
Connection: Keep-alive
```

Recommendation

According to the best practices, source maps should not be accesible for an attacker. Consult web references for more information

Outdated JavaScript libraries

You are using an outdated version of one or more JavaScript libraries. A more recent version is available. Although your version was not found to be affected by any security vulnerabilities, it is recommended to keep libraries up to date.

Impact

Consult References for more information.
